

Monthly Field Inspection Report

A realistic report combining columns, tables, form fields and a simple process diagram.

Inspection summary

The inspection team visited three service locations during the second week of August. The purpose was to check equipment condition, review pending complaints, and confirm that daily records were being maintained correctly.

North Zone Two devices were operating normally. One scanner showed occasional paper-feed errors. The operator was asked to record the issue before the next maintenance visit.	South Zone The equipment was working normally. The team also reviewed seven pending requests and found two records that needed additional information.

Inspection records

Location	Date	Documents Checked	Issues	Status
North Zone	12 Aug 2026	42	1	Follow-up
Central Zone	13 Aug 2026	35	0	Complete
South Zone	14 Aug 2026	51	2	Review
West Zone	15 Aug 2026	28	1	Follow-up

Equipment request form

Request type	Equipment issue	Requested by
Repair / Replacement	Scanner / printer / other	_____
Asset ID	_____	Date: _____
Description	_____	Priority: High / Medium / Low
Approval	Manager: _____	Signature: _____

Inspection Workflow

The report also includes a simple process diagram. The relationships between the boxes are part of the information on the page.

Receive Daily records		Check Review documents		Record Log issues		Close Confirm action
--------------------------	--	---------------------------	--	----------------------	--	-------------------------

Officer comments

The central office should receive the completed report by the end of the working day. Where an issue is marked for follow-up, the original location, asset ID, and description should remain connected to the record. Flattening the report into a single stream of text can make those relationships difficult to recover.
